Human Chain with the Red Card Against Nuclear Power

March 12, 2024 12:00 join us

In front of the European Parliament, Strasbourg.

In the context of the upcoming European elections and the commemoration of the Fukushima disaster (March 11, 2011), we are calling on candidates to make an uncompromising commitment to a European shift towards renewable energies and a green taxonomy without greenwashing or nuclear power.

Facing climate change, impacts and vulnerability in Europe:

global warming, water scarcity, resource wars and agricultural conflicts show that there are no national solutions.

Europe is a association of member states with a huge responsibility in the international landscape.

We call on you to **abolish the outdated EURATOM Treaty** and to **vote in favor of a treaty for the development of renewable energies.**

As candidates, you have a responsibility to oppose the lobbying of multinationals and make clear decisions for the future of the planet.

We call for a human chain with the red card against nuclear power!

on March 12, 2024, at 12 noon in front of the European Parliament in

Strasbourg.
